PROJECTS

1. Trainovate

Project Description:

- Trainovate platform is a kind of Elearning platform with social media features. Users can purchase courses and get the certificate on the completion of course. Users can post their job and apply for any job which is posted on the platform. It has functionality to create Job Post, Image/Video Post on the platform as well.

Roles & Responsibilities:

- My role in this project is Sr. Frontend Developer and Tech Lead as well.
- We have implemented react hooks in order to increase application performance.
- We have also implemented authentication using Social Media like Google, Firebase and Apple.
- We have provided the customized Admin panel solution to manage all the modules like Users module, Course module, Course Certificates module

Role: React JS & Next JS Developer

Technologies: ReactJs, NextJs, Bootstrap 5, Ant Design

Duration: 7 months

2. Cognitute

Project Description:

- Cognitute is a platform where Organization (Colleges) take the Students feedback and based on that Students will get suggestions to participate/take the courses and seminars.

Roles & Responsibilities:

- My role in this project was Sr. Frontend Developer and Tech Lead as well.

- The challenging part is to manage the web app that can only be accessible using the Mobile Browse and all look and feel should be like a Mobile App.

- We have implemented and Question Swipe interfaces same as Tinder swipe to manage the Question Answer section

- We have provided the customized Admin panel to manage all the modules like Manage Users, Manage Feedback and be able to view the Statistics data.

Role: React JS & Next JS Developer

Technologies: ReactJs, NextJs, Bootstrap 5, Ant Design

Duration: 1 month

3. Hello Parent

Project Description:

- Hello Parent is a platform to provide the interface between the parents and the schools and helps them to connect in an easier and faster way.

Roles & Responsibilities:

- My role in this project was Sr. Front End Developer.

- We have integrated the Message (Inbox) Module. The Users of the can easily communicate with each and can reply and forward as well.

- We have integrated the amCharts library for statistics and analytics display purposes.

Role: React JS Developer

Technologies: ReactJs, Metronic, Bootstrap 5, amCharts

Duration: 6 months

4. Bayou Diamonds

Project Description:

- Bayou is a platform to maintain inventory and clients can create the buy request for multiple diamonds and generate the orders.

Roles & Responsibilities:

- My role in this project was tech lead and Project Manager as well.
- We have customized the server side Data Table to manage the Stock list.
- We have integrated the Add to cart with the Data table so by selecting individual stock it will add to cart.
- Manage advanced search for the Stock list.
- We have integrated infinite Scroll with a server side data table to display the twin diamonds.

Role: React JS Developer

Duration: 4 months

Technologies: ReactJs, Metronic, Bootstrap 5, Ant Design
